

# Your carpets will dry in 1 hour ... Not days!

## 6 Reasons you will want to avoid traditional carpet cleaning methods & 6 reasons you will want to exclusively use the Revolutionary VLM Method

"Wet" carpet cleaning systems can push water deep into carpet fibers and backing. That takes a long time to dry. Our VLM (Very Low Moisture) process uses only a fraction of the moisture and lifts dirt to the surface as the cleaning solution evaporates quickly away.

### Here are the problems with traditional "wet" carpet cleaning systems...

1. Lots of water and high pressure. Water is driven down by high pressure, taking the dirt with it.
2. As carpet dries, dirt "wicks" back up into the fibers, causing stains to reappear.
3. Moisture, which gets into the backing of the carpet, can cause it to weaken and degrade, shortening the life of your carpet.
4. Wet, slow-drying carpet can be a breeding ground for mold, fungus, mildew and bacteria.
5. Wet carpets inconvenience you because they can't be used until they're dry...sometimes as long as 2 days later.
6. Shampoos can leave a dirt-attracting residue which causes carpets to re-soil faster.

### Our Very Low Moisture Cleaning system" is the answer

VLM carpet cleaning is the application of a safe and non-toxic cleaning solution to your carpet. When the solution is applied, dirt, spots, spills, grit and grime are instantly dissolved then quickly removed by our state of the art equipment. Carpets are dry to the touch in as little as 1 hour.

### Here are the advantages of Salem Environmental Solutions VLM Cleaning System....

1. Our pH balanced cleaning solution is safe and non toxic..
2. Stain removal is permanent, as "wicking" action is reduced.
3. Carpet backing is protected for longer life. Very little moisture reaches it.
4. Carpets dry faster than other systems. You'll be using your rooms again in about an hour.

5. Carpets dry so fast, there's virtually no time for the unhealthy breeding of mold, fungus, mildew or bacteria.
6. Carpets stay cleaner longer, since our cleaning system leaves no dirt-attracting residue.

#### OUR GUARANTEE TO YOU...

1. If we damage your carpet in any way, we perform or pay for repairs or replacement.
2. If spots return, so do we...FREE... until the spots are permanently gone.
3. If you're still unsatisfied, we will give you a full refund.

- Area Rug cleaning
