Reasons to use Kentucky's Finest Carpet Care Inc.

Here at **Kentucky's Finest** we offer a unique difference in carpet cleaning. We have been in Kentucky for 13 years and have been cleaning carpets for 33 years and have developed our own system for deep cleaning even the most difficult carpets. We market and sell our system nationwide under the name of **Carpet Care Systems**. We have perfected this system over our 33 years and have produced the finest carpet cleaning system on the market today.

Our system removes the soil, grease, dirt and stains and yet we leave you with carpets that are dry in approximately **1 hour**. We do not shampoo so the carpets stay clean much longer. We do not use steam, so the soil is not pushed deeper into the carpets but instead is removed, also the carpets are dry quicker and we never have a problem (even in the summer) with carpets that are cleaned getting that musty mildewy smell. Yet we **do** get the carpets cleaner than most our competitors.

Our system uses 100% cotton teri-cloth pads driven by a oscillating machine to pick up the dirt. Our chemical is 100% safe, non-toxic and non-flammable. It leaves no sticky residue to cause quick resoiling. The oscillating action of the pads on the carpet enable us to make once flat carpets stand up as they should. We then vacuum the carpet completely and it is usually dry in 1 hour. We often clean carpets just prior to the tenants moving in, for motels and hotels this is a large bonus. No need to leave the room vacant for the day, ***just clean it and an hour later rent it out.***

Service is also our specialty, all the accounts we clean for can attest to the timely, professional, quality work that we do. We clean carpets, extract water on emergency floods, have carpet blowers for drying flood jobs, deodorize upon request, remove rust, do minor repairs.mildicide ..etc. All at **very reasonable prices**.

Sound too good to be true? Let us prove it to you today!

Try us out at no risk or cost to You!

Call us and schedule to have us clean one of your carpets today. We will clean one room for free. Either have us clean one your cleaners rejected or have us clean one for you **after** your cleaner has cleaned it. We **will** show you the difference. We simply ask that you inspect the carpet before and after we clean it.
