If the Historical Society can **trust** us to clean their fine wools, In the Old Kentucky Capitol, you can trust us to clean your carpets!

Call for your quality cleaning today!

Kentucky's Finest Carpet Care Inc. uses Cutting Edge Technology along with Environmentally Safe Chemicals to remove Dusts, Dirt and Allergens from carpet.

Most Carpet Cleaners are taught to use strippers, acids and alkalines to clean carpet. Chemical residues and drenched carpets are left behind.

Normal Steam Cleaning or Hot Water Extraction WILL NOT remove all the dirt, and leaves the carpet wet, inducing more mold and dust mite growth, the air humid and smelling of chemicals.

The Oscillating Pad System uses very little moisture, cleans all the fibers down to the nap, removes all of the dirt, is quiet, has no hoses for guests or employees to trip over and leaves the carpet dry and ready for traffic.

Our Valued Customers

We at Kentucky's Finest Carpet Care want to serve you and clean your carpets the best they can be.

We would appreciate it if you might tell your friends or family members about our service. We are trying to build a company on satisfied repeat customers and referrals. WE want you as our **CHEERLEADERS!**

Who are we?

We came here to Lexington in April of 1992. We have been carpet cleaning since 1974 mainly in the San Diego area of California, where we are from. We also are the manufacturers of the equipment we use. We market this system worldwide under the name of **Carpet Care Systems**. This system has been perfected over the years to give you the **Finest** carpet cleaning possible.

We have companies all over the US, so we would gladly share the locations close to your loved ones and friends.

Absolutely the Finest VLM Cleaning Available!
